Alan Achatz is a former city, country, and yacht club manager who started working in the private club industry in his teens. In his 25 plus years working in private clubs, he worked in virtually all club departments from dishwasher all the way up to General Manager. Along the way, Alan obtained the Certified Club Manager and Certified Hospitality Educator designations. In 1997, he left the day-to-day club management duties and started his own business as a safety consultant. He is an OSHA General Industry Outreach Trainer. Alan is a prolific writer and has had over 100 articles published in various club trade magazines and has also written a book for CMAA titled Embracing Safety at your Club.

In addition to providing education sessions, Alan conducts simulated OSHA site tours where he identifies hazards and assists with OSHA compliance issues. Alan will be joining the Evergreen Chapter to share Facility maintenance & management concerns as well as will share safety concerns for the Ground department.

Facility Maintenance & Management: How to plan for a safe and sound club operation. This session ties into one of CMAA'S CCM Core Competency areas and will allow managers, assistants and your facility directors to communicate common concerns.

Safety Concerns for the Ground Department: What can go wrong and what has gone wrong at the Ground Department? Observations and stories gathered from 150 plus simulated OSHA site assessments will be shared. This session is not just about OSHA compliance, it is about events that have occurred on the course and in the shop. Some accidents and even fatalities were preventable!
